

FREDRICK JONES

Education

Dev Mountain, Provo, Utah
MEAN Stack Coding Bootcamp
Graduated: 2015

Utah Valley University, Orem, Utah
Graphic Design BS; AVC Department
Graduated: 2013

Professional Profile

Hello, I'm Fred and I write some pretty awesome code. With my background in design and my passion for programming, I pride myself in creating an attractive and user driven front end while maintaining a functional and organized back end. I thrive on finding creative solutions to programming conundrums. With 7 years of experience in front end development, I've been able to help focus various teams in moving to newer tech. I have also planned and developed new features as needed on multiple projects. I love the challenge of learning new languages and tech and I can pick it up quickly.
